---

Good they also owe us the document with the proposed team elevation structure can you check on that and also the name of the technical POC for the FFA SMP negotiation. These were both action items from the meeting that we should have heard back on by now.

FYI:  
I will see if we can get any more specifics on this to understand the FACA concerns better.

Julie,  
The "project" in question was a Regulatory action.

It involved Regulatory's use of a team that included mining industry representatives in the development of a regional general permit."

Thanks,  
eric

Subject: [Non-DoD Source] follow up to FACA concern

Eric:  
It was nice speaking with you a few minutes ago. As a follow up to our in person meeting last week, I'm hoping you can

provide more information about the name of the case where the Corps was sued over FACA concerns. We are trying to understand the difference in approach on tribal engagement as our guidance specifically calls out engagement with tribes for many EPA programs (including Superfund).

Thanks for any additional information you can provide so we can broaden our understanding of your concern.

Julie
